

ENHANCE YOUR ENVIRONMENT™

WHO WE ARE

TORGINOL® was founded in 1961 with the vision of pioneering the resinous performance flooring market throughout the United States. Since then, we've evolved to become exclusively focused on engineering materials that enhance the aesthetic and ergonomic qualities of living environments. Our materials combine design and function to provide optimal utility to commercial, industrial, institutional and residential surfaces throughout the world. Designers, architects, builders and home owners are inspired by the innovative patterns and textures produced by our materials.

FLAKE

POLYMER COLORFLAKES™

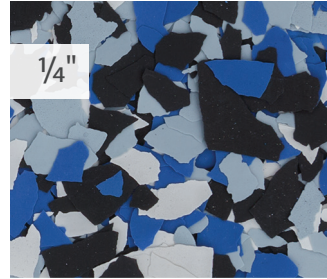

TORGINOL® Polymer ColorFlakes™, simply known as FLAKE, are specially formulated paint aggregates used to enhance the aesthetic and ergonomic qualities of resinous performance flooring and wall coating systems. Unlike conventional flooring options, ColorFlakes™ are available in a wide range of colors, sizes, styles and patterns that can be custom designed to accent, balance, complement, and influence any décor. Our unique approach to customization efficiently transforms any space into your space.

FLAKE

MARBLEFLAKES™

This timeless collection of neutral tones bring an air of sophisticated subtlety to resinous performance flooring by combining the organic hues of browns and grays with the extreme durability of the most advanced chemical and abrasion resistant coatings. TORGINOL® MarbleFlakes™ redefine the multifunctional standard for combining style and endurance with performance flooring materials.

QUARTZ

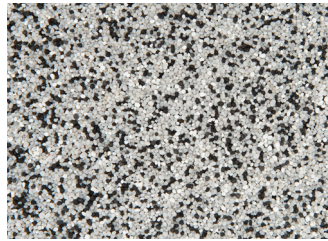

QUARTZ COLORGRANULES™

Redefining toughness with an enhanced focus on combining durability with design and functionality. From the harshest chemical exposure to the most abrasive high-traffic areas, Quartz ColorGranules™ provide the versatility to custom design a durable high performance resinous flooring system that will withstand the most severe environments. The sheer hardness of the quartz mineral will enhance both impact and slip resistance, making it the optimal solution for the most extreme surfaces.

MICA

NATURAL MICAFLAKES™

TORGINOL® MicaFlakes™ make resinous flooring glisten with natural crystalline beauty. These unique metallic flakes are derived from a group of sheet silicate minerals known as mica. Through a technical manufacturing process, the distinctive hexagonal atom arrangement of the mica minerals is separated into sheet-like pieces and broken down into standardized flake sizes. These unique flakes provide a natural metallic luster to resinous flooring systems, which cannot be achieved with other engineered materials.
