

ARIA

We make seriously beautiful vents.

Lite Collection

## Our Vision

We make thoughtful, minimalist design products that are beautiful, functional and badass.

Vents were just the beginning. Today, our business is evolving into new product categories that follow our core design principles: Simple. Modular. Functional.

Aria Vent was built on the belief that beauty and function can coexist. Our focus is to innovate building components that have been left behind by modern design trends.

That is the future of our little vent company...

## A Letter From The Founder

In 2016, my dad Paolo, and I started Aria Vent in a tiny 10'x10' storage locker as a small side hustle. Armed with an innovative product, we set out on a mission; to reinvent vents.

As a disruptor, the industry didn't realize they needed Aria Vent. We had to create the demand by taking it directly to consumers - online. Aria Vent was catching speed with contractors, and the industry took notice.

Full circle, now Aria Vent products are becoming an industry standard. Aria Vent is sold in local specialty retailers (yay!) and big box stores (big yay!) across Canada and the US.

Our products have been awarded patents, and are still proudly manufactured in Canada. Today, our company has evolved into more than vents. We also make accessories, building materials, receptacle mounts and more.

Every Aria Vent product that goes through our facility (now much larger than 10'x10'- thankfully) is overseen by our team of 10 employees. We are still a tiny business, with very big goals. We just want to make cool, innovative stuff for cool, innovative spaces.

– Roberta Mantenuto

**“Aria’s principle is to curiously challenge the status quo and find margins for innovation.”**
