CREATES GROUT JOINT

EASY REMOVAL

- For walls and floors
- System of interlocking clips and wedges ensure your floor will be perfectly level from one tile to the next
- Requires minimal effort to install and remove, plus speeds up installation time
- Prevents the tile from moving during the installation and curing process
- Breaks evenly and clean at the base every time. Ridges on the base creates the break-line under the tile so no plastic parts left in the grout joints
- Multi-polymer plastic provides greater tensile strength while remaining flexible to avoid breakage failures while tightening
- For use on porcelain, ceramic and natural stone tiles
