

SVS™ Silicone Vapor Shield™

70-198
70-198-XL

EASY FLOORING INSTALLATIONS

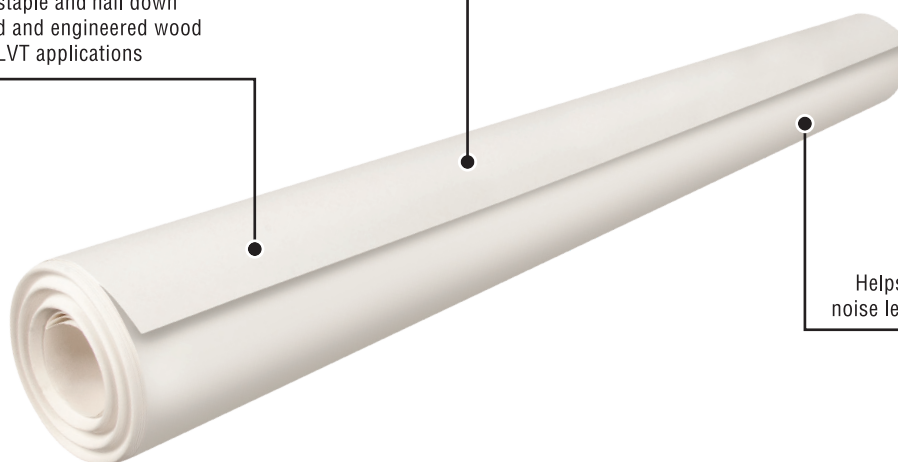

Recommended for staple and nail down installations of solid and engineered wood floors and floating LVT applications

MOISTURE SHIELD

Reduces vapor flow without trapping moisture

LESS MESS

Helps reduce dust and noise levels, clean to use

Silicone Vapor Shield is a moisture barrier underlayment made of 6 mil. wet strength paper with a backed silicone coating that will not allow moisture to penetrate through to the flooring planks.

Since SVS is made with silicone, the smooth surface allows installers to slide planks easily during installation plus it does not contain any toxic tar or tar-based ingredients found in some underlayments. Silicone Vapor Shield is made from repurposed paper that is environmentally safe and made of 100% recycled contents. The SVS is a white paper that allows a more visible chalk line and doesn't leave a black residue on hands or walls and will not fall apart during installation like red rosin, Kraft paper or wax papers do.

SVS meets the recommended perm rating guidelines as set forth by the NWFA and is suitable for use on radiant heated floors.

ITEM #	70-198	70-198-XL
UNIT OF MEASURE	EACH	EACH
COVERAGE	200 sq ft	400 sq ft
WIDTH OF ROLL	33.5"	30"
LENGTH OF ROLL	72 ft	160 ft

	SVS™	Red Rosin Paper	Asphalt Paper
Meets perm ratings recommended by the National Wood Flooring Association	✓	—	Some brands
Clean to use, no rub-off on walls and hands	✓	—	—
Ok to use with radiant heat systems - No asphalt odor	✓	✓	—
