

SKIRTING 40 made in anodized, polished and brushed aluminium in height 40 mm. Available with or without adhesive. Superior aesthetic quality and easy to lay, it is ideal for all public and private environments. Can be used with all types of flooring. In order to facilitate and to perfect the laying process, internal and external angles, plugs and junctions are recommended.

Please contact the technical department for informations concerning the skirting bending radius.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the "SKIRTING 40" also choose with or without adhesive.
2. Cut the profile to the required length, taking care to calculate the width of the inside-external corner joints.
3. For the self-adhesive version, the surface must be smooth, grease-free and not porous. It is not recommended for plaster and mortar surfaces (version without adhesive is better, using fast-setting acrylic silicone which is suitable for fixing aluminium to mortar - plaster, etc.).
4. Use the corner linking elements-joints and right and left end caps to facilitate laying.

USE PROBAND FIX FOR FIXING THE PROFILE TO THE WALL
