

PROTERMINAL CURVE are a range of edging and joining profiles that may be curved/shaped. They feature a special system of perforations allowing them to be bent easily so that particular geometric shapes may be easily obtained in situ. This allows decorative patterns to be created at will according to technical and aesthetic requirements and with a separation of 3 mm of sandable profile. The product is made in natural brass in 2.7 m bars and heights of 6, 8, 10, 12.5, 15 and 20 mm.

PROTERMINAL CURVE

NATURAL BRASS
CURVABLE

NATURAL BRASS thermo packed 10 pc
bar length 2,7 LM - packaging 40 Pcs - 108 LM (H 15 - H 20 mm - 54 LM)

PTONCV 08	8		
PTONCV 10	10		
PTONCV 125	12,5		
PTONCV 15	15		
PTONCV 20	20		

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the PROTERMINAL CURVE in the required height and material.
 2. Cut the profile to the necessary length, calculating the total length.
 3. Bend the profile mechanically with the PROCURVE MACHINE.
 4. If necessary fix with screws and screw anchors or simply insert the punched base under the floor laid with the same adhesive. Any oxidation marks may be easily removed with specific chemical products (Sidol-Smac, etc.).
- If it is used as a joining profile, bring each floor to the edge of the profile.

COLOURS

ON - Natural Brass

(for a precise assessment of colours and finishes, see the relative enclosed sheet)

PROTERMINAL CURVE are a range of edging and joining profiles that may be curved/shaped. They feature a special system of perforations allowing them to be bent easily so that particular geometric shapes may be easily obtained in situ. This allows decorative patterns to be created at will according to technical and aesthetic requirements and with a separation of 3 mm of sandable profile. The product is made in natural aluminium in 2.7 m bars and heights of 6, 8, 10, 12.5, 15 and 20 mm.
