PROVA TILE EDGE®

PROFILÉS DE JOINTS DE DILATATION COMMERCIAUX

Les joints de dilatation sont **indispensables** pour les carreaux de céramique, de pierre naturelle et de terrazzo. Généralement utilisés dans les applications commerciales de fort achalandage pour protéger les carreaux contre les fissures. **Maintenant offerts dans des hauteurs de 1,27 cm (1/2 po)!**

JOINTS DE DILATATION ROBUSTES

- En **aluminium**
- Conviennent parfaitement lorsque **placés sur des joints de contrôle et des joints de reprise**
