

# ARDEX ROVER®

## Rolling Barrel Cart

The ARDEX ROVER® Rolling Barrel Cart improves jobsite efficiency during installation of ARDEX self-leveling underlayments and toppings. The ARDEX ROVER cures the “pains” of the traditional barrel mixing and carrying process. It makes mixing and pouring easier on installers. Because it’s faster, it’s more efficient. This new tool speeds installation time through increased capacity of up to 3 bags in a single mix. Transportation of this 3-bag batch (approx. 210 lb.), is facilitated by the ARDEX ROVER Rolling Barrel Cart that also offers a precise and controlled pour. You save time and labor.

### Features:

- All in one station: Mix, Transport and Pour
- Mix and pour up to 3 bags at a time
- Easy to move and lightweight
- Precision pouring
- Four-way direction, heavy duty caster wheels
- Tilt mechanism
- Robust steel structure
- Compact and ergonomic design
- Removable barrel (sold separately)
- Made in the USA

### Benefits:

- Increase the speed of installation
- Increase efficiency of the process
- No heavy loads to carry
- Reduce worker stress
- Save time and labor
- Easy cleaning
