HARDWOOD FLOORS BY LAUZON

DISCOVER LAUZON'S EXPERT PERMA CLEAN™ TECHNOLOGY: WHERE BEAUTY MEETS PERFORMANCE

When you choose Lauzon hardwood flooring, you're not just investing in elegance, you're choosing innovation that works for your lifestyle. Alumina Finish with Perma Clean™ is Lauzon's advanced surface protection technology designed to keep your floors looking pristine with minimal effort.

Antimicrobial Protection for a Healthier Home

Integrated Ultra-Fresh® technology actively inhibits the growth of bacteria, mold, and mildew on your floors, helping maintain a cleaner, fresher environment and reducing unwanted odors.

Superior Stain and Wear Resistance

The Alumina Perma Clean™ finish forms a robust protective layer that repels spills and resists scratches, keeping your floors looking flawless even in high-traffic areas.

Effortless Maintenance

Dirt and grime are easily wiped away, and thanks to the antimicrobial properties, your cleaning routine becomes even more effective, with less effort and fewer chemicals.

Long-Lasting Beauty

This finish preserves the natural elegance of hardwood while protecting it from dulling and damage, ensuring your investment remains stunning for years to come.

Eco-Conscious and Safe

Ultra-Fresh® is registered with Health Canada and the U.S. EPA, and has passed rigorous international safety standards making it a trusted choice for families and environmentally conscious consumers.

Why Choose Lauzon's Expert Two-Ply?

Solid Construction, Engineered for Excellence

Unlike traditional engineered floors, Lauzon's two-ply technology combines the authenticity of solid hardwood with the stability of engineered construction. Each plank is a full 3/4" thick, ensuring a seamless transition between flooring surfaces and eliminating elevation gaps.

Superior Wear Layer

With a 5.2mm wear layer, these floors can be sanded and refinished up to 5 times, offering longevity that rivals solid wood. A thicker wear layer can better withstand daily wear and tear, such as foot traffic, furniture movement, and minor impacts. It provides more material above the tongue-and-groove, reducing the risk of damage reaching the structural layers.

Expert by Lauzon offers a nice selection of wood species and grades across several curated collections,
