The natural characteristics of geometric or linear patterns in carpet tile can result in double-dark or double-light lines at the seam and to some degree a pattern run-off or bias. This is not a manufacturing defect. These characteristics should always be taken into consideration when choosing the installation method of a modular carpet. Product image colors may vary due to print processes and monitor display settings. To ensure that the installation meets the manufacturers requirements please note that Kraus Premium Adhesive is the recommended and required adhesive for this product. Failure to use this adhesive may void any warranty related claims. Please see installation instructions for full details. See harrisflooring.com for latest specifications.
