- **ULTRA THIN KERF**
- **MAINTAINS BLADE DIAMETER**
- **FEWER BLADE CHANGES**
- **LESS DUST AND DEBRIS THAN CONVENTIONAL ABRASIVE WHEELS**

The PEARL XTREME™ is a revolutionary line of diamond wheels for metal applications. It is designed to cut metal, stainless steel and a variety of ferrous metals with less odor and debris compared to conventional abrasives. The Pearl Xtreme™ is engineered with a high concentration of diamonds with an extremely strong bond.

The PEARL XTREME™ features fast cutting speed compared to conventional bonded abrasives and much longer life. It is extremely efficient because it reduces the need to change wheels frequently, which increases productivity dramatically. In addition, the shape of the wheel does not change overtime; therefore, the depth of cut remains the same from the first cut to the final cut.

For use on ferrous metals, iron, steel, stainless steel, rebar and other high tensile alloys.

**VBT™  
VACUUM BRAZED  
TECHNOLOGY**  
VBT™ allows for more diamond particles to be exposed on the core. This exposure produces the aggressive cutting action.
