Beautiful and Healthy for Those You Love Most

From traditional wood patterns and modern concrete finishes to the latest encaustic tile designs, Tarkett Home's leading designers bring you a variety of flooring options that instantly update a space with your own personal style.

But there is more to our flooring than meets the eye.

When it comes to flooring, the features you don't see are even more important than the ones you do. From manufacturing to installation to cleaning, every detail of your floor affects the health and air quality of your home. Since no other surface touches you and your family more each day, we take these details seriously.

That's why **Tarkett Home Luxury Sheet Flooring goes beyond other flooring manufacturers and is CERTIFIED asthma & allergy friendly™**. Our flooring exceeds all air quality standards set for schools and hospitals.

So go ahead and focus on the design. We've got the details covered.

CLEANS EASILY

FAMILY FRIENDLY

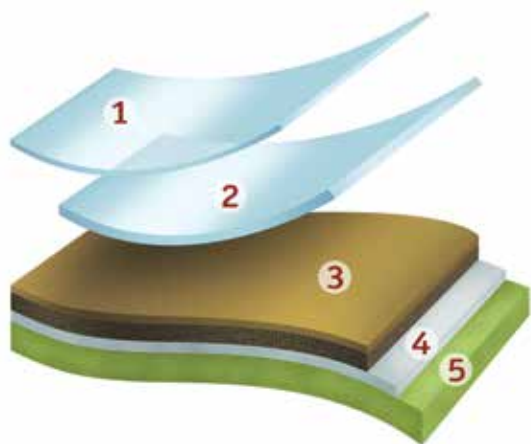

WATER-RESISTANT

PET FRIENDLY

The Tarkett Home FiberFloor® Protection System features 5 layers that resist everyday life.

1 Finish Layer

Protects against scratches, scuffs and stains for easy cleaning and maintenance

2 Wear Layer

Prevents wear, rips, tears, gouges and indentations

3 TechniCore Foam Layer

Adds cushion and additional indentation protection, creating warmth and comfort underfoot

4 Engineered Fiberglass Inner Layer

Utilizes non-woven fibers so it lays flat and won't expand or contract for increased stability

5 TechniCore Backing Layer

Allows high flexibility, easy installation and a moisture- and sound-resistant barrier for added performance

TECHNICORE
STRUCTURED FOAM TECHNOLOGY

TruTEX™

LUXURY SHEET FLOORING

Modern Floors for Modern Life.

Trust TruTEX™ Luxury Sheet Flooring to go where other floors cannot. This unique technology installs over many types of existing floorcoverings and greatly reduces the time normally spent preparing concrete and plywood subfloors. From kids' bathrooms to damp basements, the TruTEX moisture management system enhances the life, beauty and performance of your floors.

- **Resists mold, mildew & moisture staining** and backed by a 2-year, "no questions asked" AquaGuard® Guarantee (see limited warranty for details)
- The Beyond Tough™ backing **protects against rips, tears and gouges**
- Floating technology allows quick and inexpensive décor updates and **easy installation**
- **Comfortable and quiet** with TruTEX backing technology
- Moisture management makes TruTEX **perfect for wet areas** like bathrooms, kitchens and basements
- **Environmentally friendly** backing contains 50% recycled content from water bottles

Beautiful
and healthy
for those
you love
most.™

Tarkett Home Luxury Sheet Flooring is a refreshing collection of premium designs, creating inviting and comfortable spaces in every room of your home. These safe, low-VOC materials are built to last and are **CERTIFIED asthma & allergy friendly®** so you know it's safe for your family.

Doing Good. Together.

At Tarkett North America, we believe that together, we can make a positive impact on people and the planet. That's why we're Doing Good—Together, connecting our sustainability efforts with what our customers value and our world needs. It's an active, living commitment to create a future where people and the planet prosper in balance. Where sustainable flooring solutions don't just perform. They inspire.

Healthier Indoor Environments

Sixty Million Americans, or one out of five, suffer from asthma or allergies. With about 93% of our time spent indoors, Tarkett Home Luxury Sheet Flooring contributes to improved indoor air quality of homes, apartments and small businesses with flooring products that are certified by the Asthma and Allergy Foundation.

Tarkett Home Luxury Sheet Flooring has low emissions and ultra low TVOCs (total volatile organic compounds) of less than 100 µg/m³ (micrograms per cubic meter) compared to many common household items like shower curtains, carpeting and household cleaners.

Our product is also FloorScore certified and phthalate free. Through the use of Eco-Innovation and the selection of good materials, Tarkett succeeded in eliminating ortho-phthalates in our Luxury Sheet Flooring products.

It's Nice to Look Amazing with So Little Effort

Protect the investment you made by following these basic steps immediately after installing your Tarkett Home Sheet Vinyl Flooring:

- When moving heavy furniture or appliances, do not slide directly over your floor. Place plywood or hardboard panels on floor when moving furniture or appliances.
- Do not wash floor for 48 hours after installation.
- Maintain post installation temperature between 55°F and 100°F. Maintain relative humidity between 40% and 70%.

Basic Floor Protection

- Moving furniture and appliances may cause scratches or indentations in your new floor. Make sure furniture and appliances are equipped with proper, non-staining rests, glides or casters.
- High heeled shoes can cause permanent damage to many types of flooring, including tile and plank.
- Repeated exposure to direct sunlight may cause fading or discoloration. Close drapes or blinds to block direct sunlight.
- The use of non-staining, latex-backed mats at entryways is helpful in removing grit that may abrade or scratch your floor. Caution: Discoloration can occur from rubber backings and dyes used in floor mats and rugs. Floor paints and driveway sealers can also permanently discolor your floor.
- Home appliances such as refrigerators and heating system air ducts emit a direct flow of heat that, if not controlled, can exceed 120°F. This condition may cause discoloration over time. Forced-air heating system dampers should be adjusted to control outlet temperature to a maximum 100°F. Cigarettes, matches and other hot objects dropped on the floor can also cause permanent damage.

Routine Maintenance

Tarkett Home Sheet Vinyl Flooring is easy to clean and maintain. For day-to-day maintenance, the following are some simple steps that will help keep your new floor looking great:

- Sweep or vacuum* regularly to remove dirt and grit that may abrade or scratch your new floor.
- Wipe up spills promptly and thoroughly with a damp cloth or mop.
- After a period of time, it may be necessary to wash the floor with Tarkett SureShine® Floor Cleaner or equal neutral floor cleaner. Follow the detailed instructions in the CPP.
- Do not use dishwashing detergent. Any detergent film left on the floor can hold tracked-in dirt and leave the surface with a dull, cloudy appearance.
- In time, high traffic areas may begin to show a reduction in gloss. If this occurs, thoroughly clean and dry the floor and apply a light coat of Tarkett SureShine® Floor Polish. Pour the polish into a shallow pan. Using a clean, damp sponge mop, spread evenly in one direction to insure uniform application. Polish dries in 20-30 minutes. If more than one coat is desired, be sure to let each coat dry completely before applying another.

*Do not use beater bars on any vacuums to avoid damage

Tarkett Home Installation

Tarkett Home FiberFloor provides greater flexibility through three methods of installation: full adhesion, releasable adhesion and floating/loose-lay applications. When using adhesion, Tarkett Home recommends the use of QBOND-ONE™ for permanent and tacky/releasable applications for all sheet products.

For loose lay or floating installations use Tarkett Home's floating seam tape S-875 or S-860 (over concrete) which allows for multiple seams and no room size restrictions, unique only to Tarkett Home. Finish off the seams with DT-65 seam sealer for both PVC and Urethane Finishes. Unlike other seam sealers, DT-65 creates a chemical bond that fuses each side together, providing a superior bond.
