

Structure of the modular mesh underlayment system *FLEXSnap+ / FLEXSnap-R+ roll*

- The modular mesh underlayment system will be manufactured with a polyolefin.

Application

- Replaces the underlayment required for floor coverings.
- Compatible with the Green Cable™ *Surface* and Green Cable *Surface XL*.
- Protects the cable from being damaged during and after the installation.
- Allows for a more uniform transition between a tiled, heated floor and an adjacent natural hardwood floor.
- Allows to install the modular mesh underlayment system, the cable and the tiles in a room in a single day.
