

CEMENT & CONCRETE PRODUCTS™

Parging Mix

PRODUCT DESCRIPTION

Parging Mix is designed specifically for parging concrete blocks or poured concrete, above or below grade. Below grade, for interior applications only.

FEATURES

- * Easy trowelling
- * Superior binding
- * Just add water

SURFACE PREPARATION

Surfaces must be structurally sound. Clean surfaces free of dirt, sand, dust, paint, etc by brushing vigorously with a broom or stiff brush and water. If small amounts of grease or oil are present, scrub vigorously with a strong detergent solution and flood with large volumes of water.

MIXING

Empty contents of bag into mixing container. Add clean water at the rate of 5.4 liters per 30kg bag.

COVERAGE

A 30Kg bags covers 50 sq ft. at 1/8 inch thickness.
