

Tarkett Lino

LINOLEUM

Naturally
modern

NATURALLY MODERN

Made from natural constituents and enriched by more than a century of heritage, Tarkett Lino is a modern solution to the challenges of contemporary interior design.

Modern Design

Our collection reflects the natural elements that inspire it, with a broad palette of subtle shades and patterns, ideal for coordinating floors, walls and even furniture. Using texture and color, Tarkett Lino can define spaces, highlight architectural details and lend interior surfaces, both straight and curved, a sense of harmony.

Modern Sustainability

Made from natural materials, our Lino collection provides sustainable, durable flooring for commercial applications. But we go the extra mile in environmental terms, following Cradle to Cradle® principles and closing the loop with ReStart®, our take back program.

Modern Performance

While honouring the tradition behind our Lino, we also use modern technology to ensure it can tackle today's challenges. Combining a legacy of expertise with a passion for performance, our flooring is durable, functional and easy to maintain.

TARKETT LINO

LinoWall cotton 122 / Originale blossom 435

Natural, versatile and sustainable, combining tradition, craftsmanship and innovation, Tarkett Lino offers a modern approach to the flooring needs of today and lifestyles of tomorrow.

MODERN DESIGN

Rich, authentic and versatile

- Modern flooring with a **matt finish** to protect and highlight its authentic look.
- Modern, **subtle patterns and a palette of contemporary colors** that harmonise easily.
- Modern layout with a versatile collection to inspire and **coordinate all the elements in a space**, from floors to walls and even furniture.

MODERN SUSTAINABILITY

Our 2.5mm Tarkett Lino range delivers the lowest carbon footprint in its category throughout its lifecycle*

- Tarkett Lino is a bio-based product, made from **natural and renewable ingredients**.
- A complete range **C2C Certified™ Silver**.
- Contains recycled materials and is part of our ReStart® take-back program.
- **Sustainably produced** at our plant, where we work continuously to reduce our environmental footprint.
- Promotes health and well-being by offering **optimal indoor air quality** (VOC≤10µg/m³).

MODERN PERFORMANCE

Blending the best of tradition with modern performance

- **Superb durability** from our **xf2™ finish**, with excellent resistance to mechanical wear and stains, ideal for demanding environments.
- **Versatile, functional, high-performance** flooring solutions to meet a wide variety of needs.
- **Tarkett Lino has naturally anti-bacterial properties** against the most common bacteria, such as E-coli and MRSA.

MODERN DESIGN

A modern, living material

Not 'just' a covering, Tarkett Lino is a material. One that is natural and noble. It is unique, with its own distinctive hues and matt aspect.

In colors as natural as the elements from which it is made, it can cover almost any surface, from floors and walls to furniture.

Tarkett Lino is the perfect medium for architects and interior designers, allowing them to give any space its own identity.

Modern material: Tarkett Lino's **authentic matt look** gives it depth and tactile appeal. Like wood, stone or even marble, it holds the fascination of a noble raw material.

Modern look: the wide choice of colors and patterns coordinates easily with other neutral materials. Tarkett Lino's fresh, natural, tone on tone design creates an elegant effect that can be either contemporary or timeless. The different collections will complement decors from traditional (Veneto) to modern (Etrusco).

Modern layout: discover our **unique LinoWall range**, which can create the perfect match between walls and floors, building blocks of color or creating contrasts on different surfaces. The possibilities are endless, LinoWall even being capable of covering furniture to rewrite the rulebook for interiors.

MODERN RANGE

Linoleum xf²™

Our range of natural and enriched colors is designed to create coordinated, beautifully contemporary interiors. The collection comes with xf²™ surface technology for optimal resistance and easy maintenance in heavy-traffic areas.

Veneto

A heritage marble effect with vibrant colors for an authentic look.

Platinum 684

Etrusco

A modern, minimalist feel incorporating plain shades that can create blocks of color.

Shark 004

Style Emme

Combining tone on tone with a subtle marble pattern to fashion a modern classic that has a timeless quality.

Koala 794

Trentino

Creativity and vibrancy from a multicolor pattern with a lively, semi-directional design.

Cloud 505

Style Elle

A creative, dynamic pattern featuring directional linear design.

Ferro 305

The new Originale collection

The only linoleum Cradle to Cradle Certified™, Originale embodies the essence of Tarkett linoleum: authentic, design-focused and sustainable.

Inspired by the natural purity of our **100% Linen** design, Originale fuses delicately distinctive patterns with soft colors made from the finest pigments. The unique palette of tone on tone shades takes its cue from nature. Elegant, contemporary and timeless.

100% linen

Lichen

495

LinoWall

The only linoleum approved for use on walls. Conceived for architects, this completely new collection majors on creativity and versatility.

A palette of 10 colors and simple patterns, all designed to coordinate with Etrusco floors.

LinoWall comes with our exclusive xf²™ surface treatment and is Cradle to Cradle Certified™ Silver.

MODERN SUSTAINABILITY

Modern sustainable choice for people and the environment

Tarkett Lino has been made the same way since 1898 and yet it continues to be a modern, versatile and sustainable form of flooring, made of natural, renewable materials like linseed oil, pine rosin, wood and cork flour and jute. Our Cradle to Cradle Certified™ approach ensures we design our products to positively contribute to the environment and people's well-being at each step of the product's life, while supporting the transition to a circular economy.

As a result, **our 2.5mm Tarkett Lino is carbon-negative from 'cradle to gate'**, including raw material extraction, transport and linoleum production.

Cradle to Cradle Certified™ is the world's most advanced science-based, multi-attribute certification program for designing, making and verifying materials and products that are safe, circular and responsibly made.

Cradle to Cradle Certified™ products are awarded certification based upon their performance across five critical areas of sustainability: Material Health, Product Circularity, Clean Air & Climate Protection, Water & Soil Stewardship, and Social Fairness.

Lino is a durable product manufactured in a green factory from carefully selected natural materials. As a result, our 2.5mm Tarkett Lino has the smallest environmental footprint in its category throughout its lifecycle*.

Eco design

In making linoleum, we use materials that contribute positively to people's health and the environment. The closed-loop system starts here, so that good materials become future resources that can be reused:

- A complete range **C2C Certified™ Silver**.

76% of bio-sourced materials.

Up to **97%** natural raw materials - linseed oil, pine rosin, wood and cork flour, calcium carbonate and jute.

Up to **77%** from abundant renewable resources - including local suppliers.

100% of ingredients have been positively assessed according to the **Cradle to Cradle Certified™** scheme for health and the environment.

30 years Lino is a durable product with a **lifespan of up to 30 years**, as stated in its Environmental Product Declaration*.

Sustainable production

Our world-class manufacturing programme drives us to continuously improve our processes, enabling us to reduce our operational impact and preserve the environment.

100% renewable electricity.

100% recycled / recirculated industrial water in a closed-loop system. Rainwater is also collected and re-used.

34% of our energy is self-generated. We produce power from a trigeneration system to increase energy efficiency in an economic, sustainable way. We also use photovoltaic panels, a biomass boiler and a geothermal energy system.

0% production waste goes to landfill.

60% reduction in our greenhouse-gas emissions vs 2010 (equivalent to driving a car 1000 times around the world).

- Pioneering the SA 8000 Social Accountability and ISO 37001 Anti-Bribery Management Systems, in addition to existing ISO9001 quality, ISO14001 environment, ISO50001 energy and ISO 45001 Occupational Health and Safety Management Systems.

ReStart®

Positively impacts our carbon footprint.

- Tarkett Lino is part of the **ReStart® take back program** including installation off cuts and installed waste.
- **By recycling 750 tons of linoleum annually, we reduce our impact on climate change:** total greenhouse-gas savings of 7.1kg of CO₂ eq/sqm (installation waste recycling) and 5.4kg of CO₂ eq/sqm (post-use waste recycling).
- **Recycled materials** such as linoleum powder, cork and wood flour **make up 36%** of Tarkett Lino's composition, helping to reduce raw-material inputs.

Health & well-being

We create flooring designed for improved indoor air quality, which helps to protect people's health and well-being.

- **Optimal indoor air quality with all our floor- and wall coverings:** ultra low VOC emissions ($\leq 10\mu\text{g}/\text{m}^3$) 100 times lower than the most stringent industry requirements.
- **Naturally phthalate-free.**
- **Naturally inhibiting bacterial growth.** Tarkett Lino has naturally anti-bacterial properties against the most common bacteria, such as E-coli and MRSA.

Providing transparent information

For our Lifecycle Assessment we work with our main partners and relevant authorities, focusing on:

- **Responsible sourcing:** all our suppliers must meet quality, cost, environmental and social- accountability criteria.
- **ReStart® take-back and recycling program:** our Narni plant in Italy aims to increase the proportion of post-installation, and now post-use, waste that it recycles.

* Based on an installation performed by a professional installer, trained by Tarkett and following the Lino specifications.

MODERN PERFORMANCE

A hard-wearing solution over its lifetime

For 150 years, linoleum flooring has been appreciated for its natural beauty, comfort, durability and versatility in most interior environments. Tarkett was an early innovator in surface treatments, with the xf²™ technology added to its linoleum, to improve resistance and simplify maintenance for significant cost savings in daily cleaning and care.

xf²™ for excellent performance

- Micro-reinforced polyurethane UV treatment seals and hardens the surface to make it more resistant to dirt, daily wear and tear.
- No need for polish, stripping and polymer waxing over the lifetime of the surface*.

Superior resistance to abrasion and chemicals

This protective layer can be affected during use (by traffic), which we simulated with an abrasion test. The results show that a typical competitor's product is damaged after abrasion, while **Tarkett xf²™ is still intact and resistant to chemicals.**

NEW improved xf²™ welding rods

Our new welding rods are easier to install and offer excellent resistance to all kinds of soiling and abrasion for more effective cleaning.

Simplifying cleaning and maintenance

xf²™ Linoleum's reinforced surface treatment makes polish, stripping and polymer waxing unnecessary over the product's lifetime*. This means cleaning and maintenance become less frequent and less intense, reducing the use of water, energy and detergents for a smaller environmental footprint.

Naturally inhibiting bacterial growth

Tarkett Lino has naturally anti-bacterial properties against the most common bacteria, such as E-coli and MRSA.

xf²™ Linoleum's lower lifecycle cost

The initial investment and installation charges normally account for just a small proportion of a flooring's total lifecycle cost. The rest is cleaning and maintenance. As xf²™ Linoleum requires no surface treatment after installation and no wax or polish over its lifetime, the total lifecycle cost is significantly lower. Compared with other treated linoleum flooring, payback on the extra investment can be achieved within two years.

For more information, please contact your Tarkett representative.

* Provided soil barriers are correctly put in place, regular maintenance is carried out, furniture legs have appropriate coverings and daily inspections are performed.

CLEANING & MAINTENANCE

xf²™ cleaning and maintenance: no polish, no wax*

Modern cleaning protocols aim to reduce the amount of wet cleaning, replacing it with drier cleaning techniques, like the use of centrally laundered, pre-impregnated mops and more efficient machinery. This makes work easier and more effective for cleaning staff. It also reduces the environmental impact, with less need for fresh water or detergents.

Initial site cleaning

After installation, the site must be vacuum-cleaned, swept or damp-mopped to remove building dust and loose dirt. A combined scrubber/dryer with brushes or red pads cleans large areas very effectively. Use detergent with a low pH (3-5). xf²™'s surface treatment will easily withstand this kind of cleaning.

Daily and regular cleaning

Remove dust and dirt with dry or pre-impregnated yarn, microfibre or disposable mops. Alternatively, use a vacuum cleaner. Marks can be wiped off by a damp mop, either with water or a detergent solution. Ensure the floor is dry of water or fluid within 15-20 seconds of cleaning. If necessary, spray clean using a rotary cleaner equipped with red pads.

Sharp-edged or poorly maintained furniture feet, sand, pebbles and repeated movements over a specific area will damage any type of flooring over time.

Periodic cleaning

Combined machine: use diluted neutral detergent. Speed low 150-250 rpm or higher. Red/brown pads are usually most suitable.

or

Machine scrubbing + wet vacuuming

- Apply a cleaning solution (fairly strong, pH 10-11, after dilution) and leave to act for 5-10 mins.
 - Clean the floor using a heavy-duty single disc scrubbing machine (red pad).
- Vacuum up the dirty water immediately.
- Rinse with clean water and allow the floor to dry.

Training

We provide a range of on-demand training courses for distributors, installers and maintenance teams on Tarkett products, general installation and maintenance techniques, as well as site-specific installation. We can deliver these courses worldwide in our training facilities, like our Narni plant, or at customer sites. Our international technical advisers can also provide support at the start of installation or building projects.

For more information, contact your Tarkett representative.

* Provided that soil barriers are correctly put in place, regular maintenance is carried out, furniture legs have appropriate coverings and daily inspections are performed.

VERSATILE USE

Natural yellowing effect

Once unpacked and as a result of the natural production process, linoleum sometimes comes with a slightly yellow surface film. The yellow tint will disappear progressively within 24 hours of exposure to sunlight. The phenomenon is reversible and the yellow film might reappear in areas covered by furniture or other objects. It will of course disappear again once exposed to daylight.

NATURE'S FLOORING SOLUTION

- Made entirely of natural raw materials; all abundant or rapidly renewable resources.
- For over 20 years, Lino has been made using the same sustainable recipe for generations.
- Lino is the first in the industry to earn Cradle to Cradle certification.

HERITAGE

The Tarkett Lino plant celebrates its 124th anniversary in 2022.

The Tarkett linoleum plant at Narni (Italy), easily recognisable by its distinctively shaped ovens building, began producing linoleum at the end of the 19th century. The plant represented one of the region's earliest industries, shaping the development of Narni and the surrounding area.

Traditional flooring made in Italy

One of Italy's smallest regions, Umbria lies directly in the centre of Italy. The Tarkett linoleum plant started production in Narni in the late 19th century, when European countries commonly used linoleum for flooring and wall-coverings. By the 1920s, there were around 100 sites making linoleum. In the early 1990s, Tarkett began modernising the entire production process. Today, Narni is accredited ISO 9001 Quality System and holds important environmental certifications including ISO 14001, ISO 50001, ISO 45001 Occupational Health and Safety Management Systems SA 8000 Social Accountability, ISO 37001 Anti-Bribery Management Systems, the Nordic Swan Ecolabel and Der Blaue Engel.

Tarkett is a global player, exporting more than 90% of its linoleum across the world.

Tradition and innovation

Mindful of the environment, we have innovated and improved our manufacturing practices to reduce our operational impact. As a result, Tarkett Lino is a flooring solution that blends craftsmanship with the most advanced technology.

The weld rods listed are intended to correspond with the denoted flooring colors. Other weld rods can be used for a variety of visual effects.

The legends
loved
linoleum.

As the Modernist architectural movement ushered an era of practical minimalism and functional beauty, its leading visionaries embraced the pure form and natural simplicity of linoleum floorcoverings. **Le Corbusier, Gropius** and **van der Rohe** covered Modernist landmarks with the only material that allowed them to communicate a progressive optimism for the time. Made entirely of natural raw materials, Tarkett's Lino is created with the same sustainable recipe we've been using for more than 120 years. Every ingredient is abundant or rapidly renewable, and 30% of its content is recycled. Our facility in Narni, Italy operates on a closed-loop water system and 100% renewable electricity. From this tradition of craftsmanship and innovation, Tarkett Lino was the first in the industry to earn Cradle to Cradle Silver certification. **And the legend lives on.**

DISCLAIMER: Although the utmost care is taken, the data here given could differ and be subject to modifications from a technical point of view.

In its strive to improve its floor solutions, Tarkett reserves the right to modify its technical specifications, colours and materials at any moment and without prior notice. Please, check the effective availability of the products presented at the time of order. Due to the technical limits of reproduction and printing techniques used, the appearance (colour) of the product may vary from the samples, panels or other visual display materials exhibited to the customer. It is mandatory to have the products installed properly if they are to service correctly and safely. Refer to Tarkett technical installation and maintenance directions, available at www.tarkett.com or at your Tarkett dealer.

SUSTAINABILITY

Tarkett was the first linoleum flooring manufacturer to be Cradle to Cradle Certified™ - underlining our strong commitment to sustainability.

Product certifications

All our linoleum ranges

International certifications

*Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

Declare.

*Carbon biobased

Factory certifications

All our linoleum products are eligible for LEED v4 credits. For more information: <http://www.c2ccertified.org/products/registry>

TARKETT HUMAN-CONSCIOUS DESIGN™

Tarkett Human-Conscious Design™ is our pledge to stand with present and future generation. To create flooring and sports surfaces that are good for people and for the planet. And to do it every day.

We deliver on this through the synergy of three commitments:

- Deep human understanding
- Conscious choice. For people and the planet.
- With you. Every step of the way.
