APPLICATIONS

## SUSTAINABLE BY DESIGN

Pliteq Sports flooring reduces project environmental impact without compromising performance.

## ENGINEERED TO PERFORM

From weights, sleds, and sticks to cleats, skates, ski boots, and more, Pliteq is proven to stand up to whatever athletes put down.

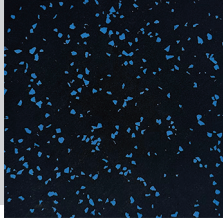

## INNOVATING TO EXCEL

Pliteq Sports applies engineering — in the lab and in our manufacturing facilities — to the continuous development of innovative products.

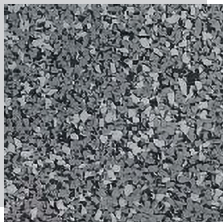

# WORLD-CLASS PERFORMANCE MEETS CUSTOM DESIGN

Our product portfolio can be customized to meet any requirement

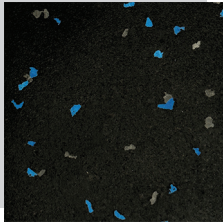

## VersaTREAD

The least porous non-vulcanized rubber flooring available, **VersaTREAD** is a practical solution that offers unmatched durability and tear strength to withstand hours of nonstop abuse. Its patented shock-absorbing and non-slip surface provides a safe, comfortable option that's easy-to-clean and sustainable.

## VersaDUEL

Get the perfect balance between stability and cushion under foot with Pliteq's dual-bonded finished flooring. **VersaDUEL** controls impact shock and vibration and is available in an array of colors and thicknesses, from 15 to 70mm, for durable, low-maintenance performance anywhere.

## VersaRUBBER®

Designed for both safety and durability, **VersaRUBBER®** offers a vulcanized construction that stands up to high-traffic commercial areas and sports/fitness facilities with a non-porous floor that repels sweat and liquids to reduce slips/falls and minimize clean-up, odor, and maintenance.

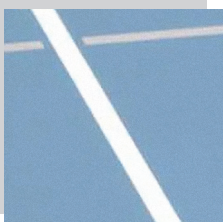

## VersaRUBBER® ELITE

Our plank-style rubber flooring, **VersaRUBBER® ELITE**, offers double-vulcanized rubber construction that stands up to high-traffic commercial areas and sports/fitness facilities. With slip resistance and cushioned comfort, this versatile flooring is easy to install and maintain.

## VersaTURF

**VersaTURF** is a multifunctional gym turf that elevates dynamic training and indoor sports with its super-soft fiber technology, offering unparalleled comfort and a plush feel that transforms any area into a safe, efficient, and versatile sports and fitness environment. Its 5mm foam-action back layer reduces impact and injury risk and is ideal for activities such as agility drills, soccer, and indoor lacrosse.

## VersaFLO

**VersaFLO's** state-of-the-art pad-and-pour floor system combines a shock-absorbing rubber base with a durable, seamless polyurethane wear layer for exceptional cushioning and safety that makes it ideal for high-impact sports and multi-use recreational facilities.
