VE5 Snowcap, VH1 Mariner, VJ9 Torch Lake, VG6 Canary

Good design for people and planet

The importance of interior design stretches far beyond aesthetics. Today's interiors are expected to support the comfort, productivity and wellness of every occupant. With excellent slip resistance, rubber tile can help reduce slip-and-fall accidents—while also cushioning underfoot and softening acoustics. We've combined these natural properties with gentle color combinations inspired by the outdoors, and manufactured them in a facility that's powered by 100% renewable electricity. It's the perfect union of safety and style—for both people and the planet.

ON COVER:
VE7 Mt Rainier, VF4 Husk, VJ2 Sand Shoreline, VJ7 Old York

VE2 Lake Shore, VF1 Octoberfest, VH4 Golden Flash
VH5 High Bridge Trail, VJ1 Sailor

Safety and style go hand in hand

The right stairwell management system improves both the safety and appearance of these critical spaces, helping reduce risk and improve mobility from top to bottom. With thousands of possible combinations, Johnsonite's comprehensive stairwell management system provides no shortage of options. Combined with Color Splash rubber tile, our complete system of products helps balance the needs of every project.

Tarkett Solution SPECtrum™

Design more brilliantly.

At Tarkett, we believe in placing people in the center of every space. So we've developed a portfolio of products designed to work together both functionally and aesthetically, helping you create more supportive spaces that maximize return on investment. Our full palette of colors, patterns, and textures is coordinated to work together visually across product categories—creating the perfect balance for people, planet, and performance.

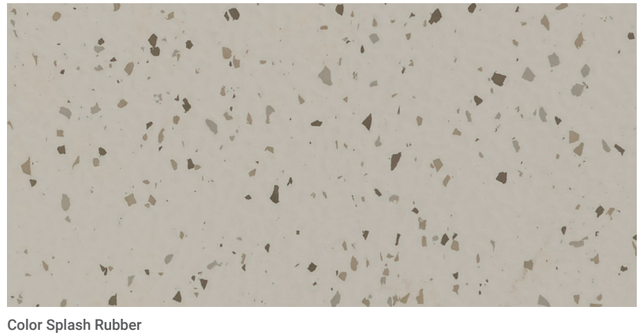

The Brilliance℠ Digital Color System puts the entire TARKETT SOLUTION SPECtrum portfolio at your fingertips—no matter where you happen to be working. Within one digital tool, you can save favorite surfaces to project boards, visualize them in a space, and order samples. By getting the right color match every time, the tool reduces sample waste and shipping, helping us all design more responsibly and reduce our carbon footprints. Speak to your Tarkett sales representative to get started, or visit **brilliance.tarkett.com**.

Proof in Every Step℠

For years, Tarkett has raised the sustainability standards of our industry. We took the first steps and are determined to stay a step ahead.

And while inspirational words are great, we know impact is in the numbers — numbers subjected to intense third-party scrutiny. So, at Tarkett we don't just say it, we prove it.

These three values help us stay the course when it comes to sustainability.

Setting New Transparency Standards

What you begin with affects everything that comes after it. That's why we subject our products to relentless scientific scrutiny and third-party testing and offer radical transparency about our materials and operations.

Empowering the Next Step in the Value Chain

We make our business partners and customers more inherently sustainable with products and practices that consider every step in the value chain.

Creating Healthier Futures

We base all our sustainability initiatives on our commitment to create healthier environments indoors and out, today and for generations to come.

You can feel confident in the numbers

A holistic approach you can count on...

95%

of our raw materials are third-party assessed for their impact on human and environmental health based on Cradle to Cradle criteria.

70%

of raw materials are abundant, rapidly renewable or recycled.

14

zero-waste to landfill manufacturing plants.

...And certifications you can trust.

2011

started working with EPEA to integrate Cradle to Cradle principles into every facet of our business.

2013

first commercial flooring CERTIFIED asthma and allergy friendly®.

2022

Powerbond RS is the first soft surface product in the industry to be CERTIFIED asthma and allergy friendly®.

We're leaders in radical transparency.

100 ppm

raw materials content revealed down to 100 parts per million.

When most manufacturers reveal raw materials content down to just 1,000 ppm, there's simply no contest.

We've been providing Material Health Statements since 2013 to give you peace of mind about the content of our products.

Setting tomorrow's standards...

99%

of flooring solutions have low VOC emission levels — 10x lower than the most stringent world standards.

100%

ortho-phthalate-free vinyl production. First company to eliminate ortho-phthalates from all products.

...For globally recognized excellence.

2010

first flooring manufacturer to join the UN Global Compact.

2021

awarded the Gold medal by EcoVadis; now ranked among the top 2% of companies in our industry rated by EcoVadis.

2022

scored A-, the CDP management level, regarding the climate change performance assessment.

At Tarkett, social and environmental responsibility aren't add-ons. They're woven, stamped and sealed into everything we do. But more importantly, we don't just say this, **we prove it.**

Sustainability attributes

RUBBER TILE

Carbon Footprint:
Carbon neutral available upon request

Healthy materials:
95% raw materials third-party assessed; non-PVC

Indoor air quality:
FloorScore® certified; meets CDPH 01350 v1.2

Multi-attribute certifications:
Cradle to Cradle Certified® Silver

Transparency documentation:
Product-specific EPD, Declare
Material Health Statement

Responsible end of use management:
Part of Tarkett ReStart program for take back and recycling

Transparency documentation

At Tarkett, transparency, social responsibility and environmental stewardship aren't add-ons—they're part of everything we do. By partnering with ecomedes and mindful MATERIALS, we make it easy for you to explore our sustainable flooring product options, their product certifications, green building systems and federal standards support documents.
